IT Services

Extended IT Services

- Shared Model
- Core & Flex Models
- Application Development, Maintenance & Support
- Quality Assurance & Testing
- Integration Services
- Analytics & DWBI
- DevOps

Co-innovation Center/ Center of Excellency Services

- Product Innovation – Prototype, POC, GTM
- Product Ideation & Continuous Improvement
- Product or Services – Planning, Design, Requirements & feasibility, Development, Integration, Testing, Implementation, Operations, Maintenance
- Model for Established & Start-ups organizations

Consulting

Enterprise IT Architecture

- EA Blueprinting
- Portfolio Assessment
- Solution Architecture & Design Support
- System Integration Methodologies and Tools

Digital Transformation

- Application Modernization
- Next-Gen Application Development Frameworks
- Business Process Driven Transformation
- UX Strategy
- Cloud Computing
- Consulting Services

Platforms

TechVision+

Leverages AI/ML, Intelligent Vision Platform to provide innovative solutions for solving the industrial problems

Supply Chain

- Dynamic Product Storage
- Item Detection & Verification
- Real-time Visibility
- Pick & Pack Optimization
- Exception Handling
- Automated Box Dimension Measurement
- Workforce Safety

Retail

- Out-of-Stock Compliance
- Planogram Compliance
- Digital Item Locator

Workspace

- Contactless Entry/Exit
- Facial Recognition
- People Tracking & Geo-fencing
- Workforce Safety & Security
- Protective Wear Check & Social Distancing

Manufacturing

- PCB Inspection
- Anomaly & Defect Detection
- Assembly Line Inspection & Optimization

"Their ability to source quality talent and draw on their internal resource base of experts was important, equally was their ability to proactively identify gaps, take responsibility, and expediently close those gaps, key to considering and retaining them as our preferred vendor.

Ravi Ganesan
Founder - *Idyllic*

"Contributed to our success by providing end-to-end implementation of the service with Android & iOS native apps for end users. I am extremely glad to have TechVedika as dev partner and our team thoroughly enjoyed the working style of their highly motivated & committed team which, am sure will go many places. But for TechVedika's team Bento would not have been able to deliver MVP in record time and on budget.

Ram Sudireddy
Founder, Chairman & CEO-
Bento Dental Management Platform

"TechVedika has been an ideal partner for Accushield. TechVedika has worked within our budget to produce a high-quality product. Their team quickly understood our business and has met several very aggressive deadlines that were critical to Accushield's success –with the attitude of being in-house team members rather than outsourced contractors. Thanks to their team for the great contributions they made to our success at Accushield!

Allen Barnes
President & CEO - *Accushield*

"Played the Technology & dev partner role to deliver the desired solution with a strong team across all aspects of the development life cycle. Techvedika is an excellent partner for firms to develop world classapplications by taking an idea, conceptualizing the design, creating the project structure with their agile methodology, completing the development and delivering a hosted cloud solution.

Arun Parimi
CEO - *Arevea*
